

## EXPLORE HAVER'S COMPREHENSIVE ARCHIVE DATABASES

Delivering precision data for 45 years and counting

### A Wealth of Historical Insights

Access historical as-reported time series encompassing a wide range of macro, market and sector data for the global economy. Haver provides archive data for 20+ years or from the inception of the database.

### Unrevised Snapshots

Archive databases are as-reported time series encompassing a wide range of macro, market, and sector data for the global economy. All Metadata provided includes comprehensive descriptions and precise timestamps that Haver applies to every time series within minutes of source release.

### Terabytes of Data for AI and ML Applications

Tap into the power of historical data with our archive data and elevate your analysis. Haver's archive data are made available via RESTful API which is part of the HaverView cloud-based platform. This data lake of information fuels AI and ML outcomes permitting clients to realize new insights and opportunities. Quants can leverage open-source toolkits to uncover hidden patterns, develop forecasts, test models, manage portfolios and review historical policy decisions.

### Key Benefits

- ✓ True, uncurated snapshots of DLX databases unrevised from the point in time of update.
- ✓ All time series for Haver archive database include timestamps from within minutes of the data being released by the source.
